| FEATURES	BENEFITS
DiamondTec Proprietary Finish	AC5 abrasion resistant finish is the highest durability rating available.
Wear Layer Protection	20mil wear layer. A thicker wear layer equals higher quality and longer lifespan.
High Density EVA Attached Underlayment	1.5mil EVA pad provides sound reduction, and helps correct minor sub-floor imperfections.
Realistic Wood Appearance & Texture	The texture of your floor will follow the pattern of the color film, giving it a three dimensional look that you can see.
Floor Score Certified	Indoor Air Quality Performance has been approved. Environmentally friendly and 100% formaldehyde free.
CLIC Locking System	Engage the flooring panels by angling and snapping. One of the easiest locking mechanisms for do-it-yourself installations.
Clean Protection	Stain and mold surface resistant.
Simple Maintenance	No specific treatment or wax needed. Regularly sweep and use a damp mop as needed.
Life Ready	Protects against spills, scratches, and dents.
All Grade Level Approved	It can be installed in the attic, basement, mudrooms, bathrooms and kitchen. All interior rooms are approved.
100% Waterproof	Waterproof for spills and prolonged exposure to water or liquid accumulated on the surface.
Durable – High Density	Due to its stone polymer composite mix, the planks have a strong rigid construction, which is extremely impact resistant.
Lifetime Residential Warranty	Manufacturer's lifetime limited residential and 10-year commercial warranty.
